Subject: New Cassel/Hicksville Groundwater Contamination Site - Deliverables

All,

EPA is in receipt of the Eastern Plume Group's submittal of the supporting deliverables required under Section 5.7 of the Amended Statement of Work #1 ("SOW") attached to the Amended Unilateral Administrative Order for Remedial Design, Index No: CERCLA-02-2018-2015 ("UAO"), and the Central Plume Group's request for an extension to April 12, 2021, for the submittal of these deliverables.

As set forth in Section 6.2 of the SOW, the submittal of these supporting deliverables is a "Common Work Element" as this term is defined in Paragraph 7 of the UAO. Section 6.2 of the SOW also states that if the Western Plume Group fails to comply, as they have done, then this work is to be performed as a combined effort by the Eastern and Central Plume Groups. Common Work Elements, and all combined efforts, are to be performed through the coordination of the Project Coordinator designated by the Respondents under Paragraph 53.a.(1) of the UAO. The Project Coordinator's role is to submit "combined, comprehensive and cohesive documents." Your clients' failure to submit a combined set of supporting deliverables is a violation of the UAO.

Although we will consider the submittal of two sets of deliverables a violation of the UAO, for these deliverables only, EPA will review the two sets of documents. Our comments on the deliverables will be sent through Ernie Rossano, your clients' designated Project Coordinator.

By this email, EPA is also agreeing to an extension to April 12, 2021 for the submittal of the Central Plume Group's supporting deliverables.

If you have any questions, please call me at the number below. Thank you.

Julio F Vazquez
